# VISION

Practical, long-lasting and beautifully eye-catching products.

As a reputable green company we use environmentally friendly processes such as the use of recycled and non-contaminating materials as well as the promotion of photocatalytic technologies.

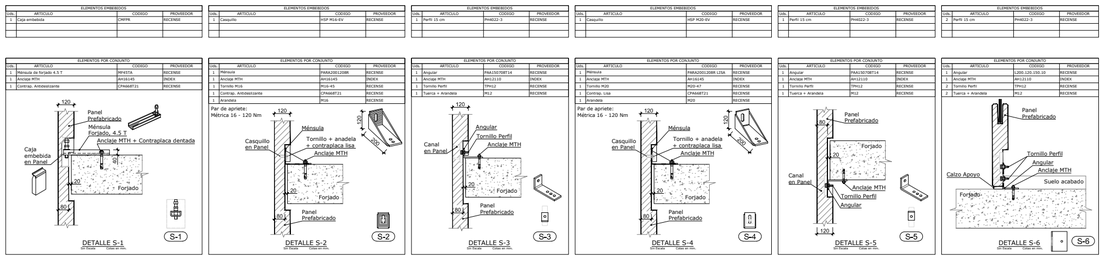
Prefabricados PONCE strives to exceed expectations through consistence  in quality, being able to undertake even the most complex of facade packages. All our design, manufacturing and quality are carried out in accordance with international standard.

Sophisticated technology. Our state-of-art machinery coupled with stringent quality control processes ensure the production of the highest quality material, with a constant final result.

From inception to execution each of our projects is supported by highly skilled experts of estimating, technical and engineering professionals. Customer satisfaction is of our utmost priority. With us there is no glass ceiling, the sky is the limit!

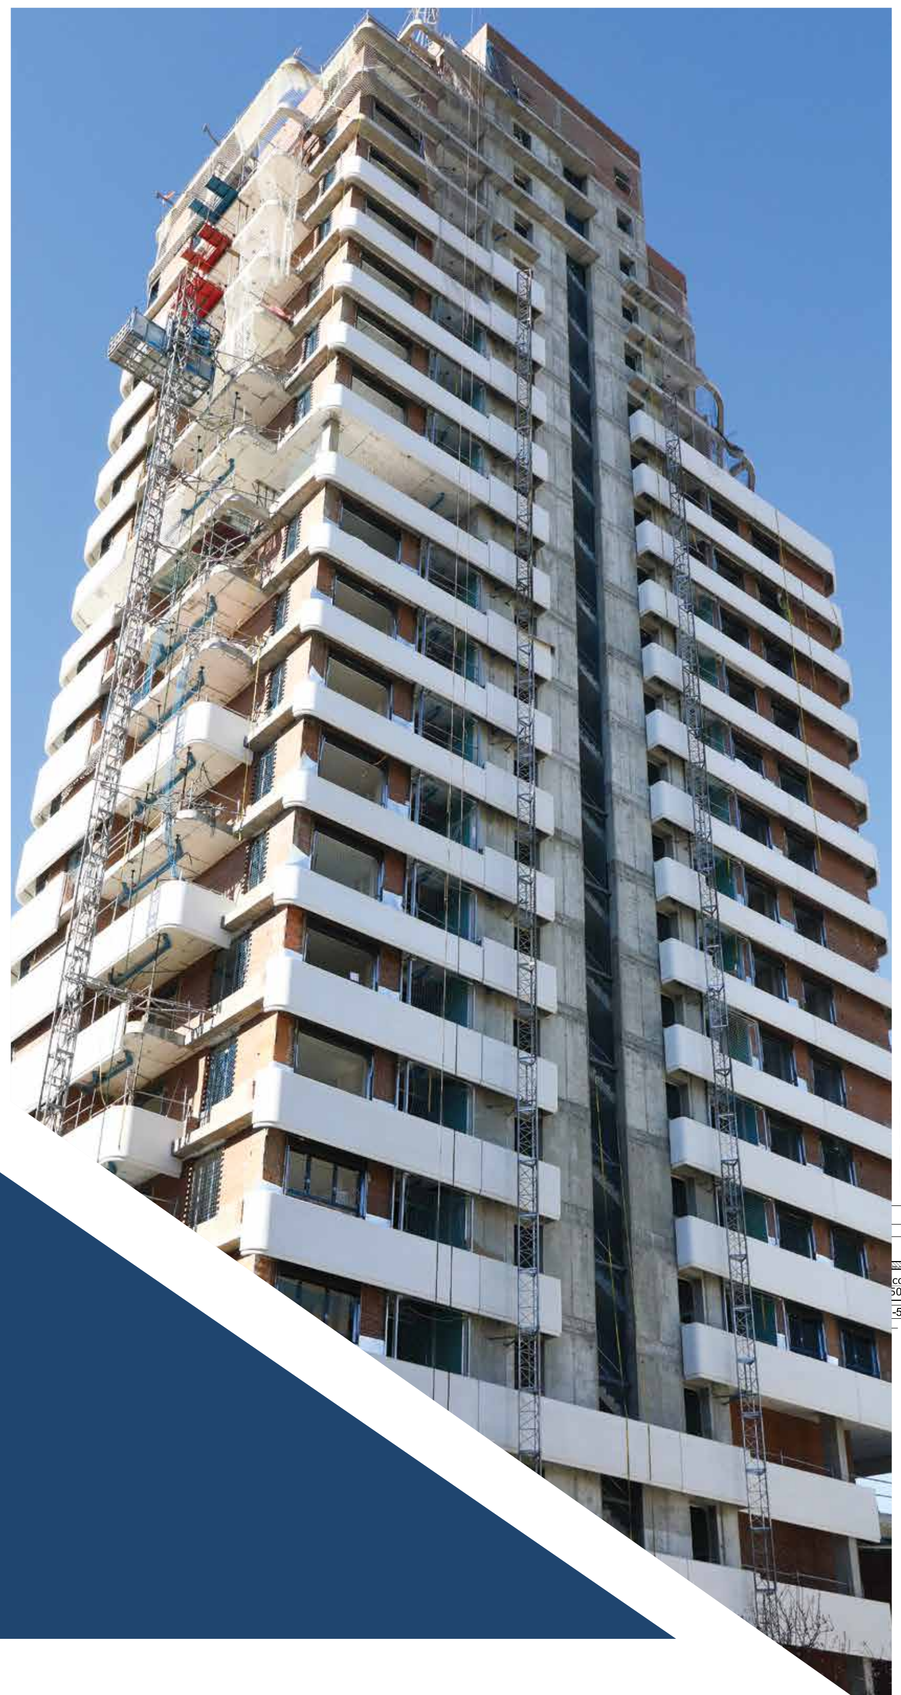
We look for the achievement of your project counting on our expertise to develop personalized elements.

# HOW WE WORK



## PRECONTRACTING STAGE

1 Understanding the project and its needs.
Architectural intentions
Structure characteristics
Materials. Textures. Colors
Timings



2 Pre-dimensioning. Preliminary modulation.
Panel types
Available fixing points
Optimizing, molds, transport and installation

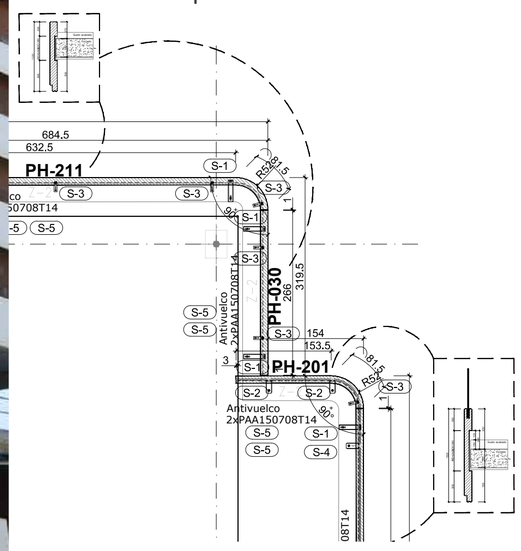
3 Detailed measuring. Quantities review PONC
Panel types
Panels´ characteristics
Windows, voids

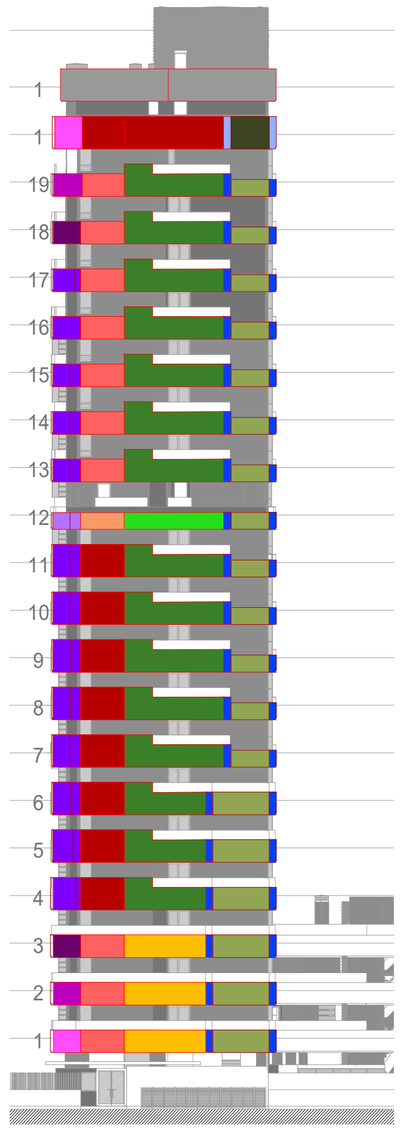
## PRODUCTION STAGE

4 Detailed designs. Plans, elevations, sect
Definitive modulations
Special details definition
Elements coding

5 Detailed designs. Engineering and calcu
Fixings definition
Workshop plans of each panel
Detailed memories

6 Production planning
Molds designs
Installation priorities
Optimization on the use of molds





7 Manufacturing process

8 Transportation

9 Installation Directly contracted to PONCE
Done directly by the client with PONCE´s accompaniment
